PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 6+ years of experience building scalable SaaS platforms, AI-enabled automation systems, and modern web applications using React.js, Next.js, Node.js, GraphQL, and cloud-native technologies. Experienced in leading distributed development teams, architecting end-to-end products, collaborating directly with stakeholders, and delivering production-ready solutions across fintech, healthcare, workflow automation, analytics, and AI-driven platforms.

Strong background in scalable backend architecture, API design, product engineering, cloud infrastructure, and AI workflow integrations, including conversational systems, automation pipelines, document intelligence, and LLM-powered productivity solutions. Proven ability to independently own technical execution from planning and architecture to deployment and long-term maintenance in remote and fast-paced startup environments.

CORE SKILLS

Frontend Development

React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend Development

Node.js, Express.js, NestJS, GraphQL, REST APIs, Apollo GraphQL

AI & Automation

LLM Integrations, AI Workflow Automation, Conversational AI, Prompt Engineering, Document Intelligence, AI Assistants, Voice AI Systems, Workflow Orchestration

Cloud & DevOps

AWS, Docker, Azure, DigitalOcean, Serverless Architecture

Databases

PostgreSQL, MongoDB, MySQL, Firebase

Tools & Collaboration

GitHub, GitLab, Postman, VS Code, Agile Development, Sprint Planning, PR Reviews, Technical Architecture, Stakeholder Communication

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer (Freelance / Contract)

Remote | July 2020 - Present

- Architected and delivered scalable SaaS and AI-enabled platforms for startups and product-focused businesses across healthcare, fintech, workflow automation, analytics, and collaboration domains.
 - Led distributed development teams of up to 7 engineers, managing architecture decisions, sprint planning, code reviews, feature execution, and technical delivery.
 - Built scalable frontend applications using React.js, Next.js, TypeScript, and GraphQL with focus on maintainability, performance, and user experience.
 - Designed and developed backend systems using Node.js, NestJS, PostgreSQL, MongoDB, Firebase, and cloud-native infrastructure.
 - Collaborated directly with founders, business stakeholders, and product teams to transform business requirements into scalable production-ready applications.
 - Implemented AI-driven workflows, conversational interfaces, automation systems, and document-processing pipelines using modern LLM-based architectures.
 - Improved engineering productivity and scalability through modular architecture, reusable systems, structured workflows, and scalable API design.
 - Delivered multiple long-term client projects involving SaaS platforms, real-time systems, analytics dashboards, automation tools, and AI-integrated solutions.
-

Full Stack Developer

Logicwind | August 2018 – June 2020

- Developed and maintained scalable web applications using React.js, Node.js, GraphQL, and modern JavaScript frameworks.
 - Worked closely with cross-functional teams to implement frontend features, backend APIs, and scalable application workflows.
 - Contributed to SaaS product development, database optimization, API integrations, and application performance improvements.
 - Participated in Agile development workflows, sprint planning, debugging, deployment processes, and client collaboration.
-

SELECTED PROJECTS

Finideas - Wealth Management & Financial Services Platform

Tech Stack: React.js, Node.js, GraphQL, PostgreSQL

- Led end-to-end development of a scalable fintech platform from initial planning and architecture to production delivery.
- Started as a solo developer and scaled engineering execution by building and leading a development team of 7 engineers.
- Designed scalable APIs, dashboard systems, financial workflows, reporting systems, and client-facing management tools.
- Collaborated directly with stakeholders on requirement gathering, sprint execution, architecture planning, and product evolution.
- Established structured engineering workflows including PR reviews, modular backend architecture, and scalable deployment practices.

Project URL - finideas.com

SteerHealth - Healthcare Communication & Automation Platform

Tech Stack: Next.js, Node.js, GraphQL

- Contributed to scalable healthcare communication systems focused on patient engagement and workflow automation.
- Developed backend APIs, frontend workflows, and platform features supporting digital healthcare experiences.
- Worked on scalable architecture and performance-focused implementations for enterprise-grade healthcare workflows.

- Collaborated with distributed teams and stakeholders in a fast-paced product development environment.

Project URL: [SteerHealth](#)

Simsola - AI Collaboration & Workflow Platform

Tech Stack: Node.js, Next.js, Python, AWS, Docker

- Worked on AI-enabled collaboration and workflow systems integrating automation-driven user experiences and scalable cloud infrastructure.
- Contributed to backend architecture, workflow orchestration, and scalable application delivery using cloud-native technologies.
- Participated in AI-focused product workflows involving automation systems, modern application architecture, and scalable backend services.

Project URL: [Simsola](#)

Portfolio Insider - Financial Analytics & AI Insights Platform

Tech Stack: React.js, Node.js, Firebase

- Developed analytics-driven platform features focused on financial market intelligence and investment insights.
- Built scalable frontend dashboards, backend systems, APIs, and data-driven workflows supporting financial analytics.
- Contributed to AI-assisted data processing and intelligent reporting workflows for investment research use cases.

Project URL: [Portfolio Insider](#)

AI AUTOMATION & EXPERIMENTAL SYSTEMS

- Developed multiple AI-powered automation systems focused on conversational AI, workflow orchestration, document intelligence, and productivity automation.

- Built proof-of-concept platforms including AI business analyst systems, AI customer support assistants, AI interview simulators, AI voice interaction systems, AI resume generation tools, and document intelligence workflows.
- Experimented with LLM integrations, multi-step automation workflows, AI-assisted content generation, voice AI systems, and structured AI interaction pipelines.
- Designed modular AI workflows for rapid experimentation and scalable product integration concepts.
- Worked on modern AI engineering concepts including conversational systems, workflow automation, tool-based interactions, and AI productivity solutions.

Selected AI Systems:

- AgentFlow AI
- AI Business Analyst
- AI Customer Support
- AI Image Generator
- AI Job Interview Agent
- AI Resume Generator
- AI Voice Chat
- AI Voice Calling
- DocMind AI
- ProposalIQ

Architecture snapshots and workflow demos are available in portfolio.

LEADERSHIP & COLLABORATION

- Led and mentored development teams across frontend and backend engineering workflows.
 - Conducted PR reviews, sprint planning, architecture discussions, and technical execution planning.
 - Collaborated directly with clients, founders, and stakeholders to define scalable product roadmaps.
 - Experienced in remote collaboration, Agile workflows, feature prioritization, and long-term product ownership.
-

EDUCATION

Master of Science in Information Technology (M.Sc IT)

Uka Tarsadia University (UTU), Bardoli, Gujarat

Bachelor of Science in Information Technology (B.Sc IT)

Uka Tarsadia University (UTU), Bardoli, Gujarat

ADDITIONAL INFORMATION

- Open to Remote Opportunities and Long-Term Product-Focused Roles
- Available to Join Within 1 Week
- Experience collaborating with distributed teams, startups, and product-driven organizations
- Portfolio includes architecture snapshots, workflow demonstrations, and selected AI system implementations
