Portfolio: [Link](#)

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 4+ years of experience building scalable SaaS platforms, AI-enabled automation systems, and modern web applications using React.js, Next.js, Node.js, GraphQL, and cloud-native technologies. Experienced in leading distributed development teams, architecting end-to-end products, collaborating directly with stakeholders, and delivering production-ready solutions across fintech, healthcare, workflow automation, analytics, and AI-driven platforms.

Strong background in scalable backend architecture, API design, product engineering, cloud infrastructure, and AI workflow integrations, including conversational systems, automation pipelines, document intelligence, and LLM-powered productivity solutions. Proven ability to independently own technical execution from planning and architecture to deployment and long-term maintenance in remote and fast-paced startup environments.

CORE SKILLS

Frontend Development

React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend Development

Python, Node.js, Express.js, NestJS, GraphQL, REST APIs, Apollo GraphQL,

AI & Automation

LLM Integrations, AI Workflow Automation, Conversational AI, Prompt Engineering, Document Intelligence, AI Assistants, Voice AI Systems, Workflow Orchestration

Cloud & DevOps

AWS, Docker, Azure, DigitalOcean, Serverless Architecture

Databases

PostgreSQL, MongoDB, MySQL, Firebase

Tools & Collaboration

GitHub, GitLab, Postman, VS Code, Agile Development, Sprint Planning, PR Reviews, Technical Architecture, Stakeholder Communication

PROFESSIONAL EXPERIENCE

Full Stack Engineer (Freelance / Contract)

Remote | March 2022 - Present

- Architected and delivered scalable SaaS and AI-enabled platforms for startups and product-focused businesses across healthcare, fintech, workflow automation, analytics, and collaboration domains.
- Built scalable frontend applications using React.js, Next.js, TypeScript, and GraphQL with a focus on maintainability, performance, and user experience.
- Designed and developed backend systems using Node.js, NestJS, PostgreSQL, MongoDB, Firebase, and cloud-native infrastructure.
- Collaborated directly with founders, business stakeholders, and product teams to transform business requirements into scalable production-ready applications.
- Implemented AI-driven workflows, conversational interfaces, automation systems, and document-processing pipelines using modern LLM-based architectures.
- Improved engineering productivity and scalability through modular architecture, reusable systems, structured workflows, and scalable API design.
- Delivered multiple long-term client projects involving SaaS platforms, real-time systems, analytics dashboards, automation tools, and AI-integrated solutions.

SELECTED PROJECTS

Finideas - Wealth Management & Financial Services Platform

Tech Stack: React.js, Node.js, GraphQL, PostgreSQL

- Led end-to-end development of a scalable fintech platform from initial planning and architecture to production delivery.
- Designed scalable APIs, dashboard systems, financial workflows, reporting systems, and client-facing management tools.
- Collaborated directly with stakeholders on requirement gathering, sprint execution, architecture planning, and product evolution.
- Established structured engineering workflows including PR reviews, modular backend architecture, and scalable deployment practices.

Project URL - finideas.com

ShopSignal.io - AI Call Intelligence for Auto Repair Shops

Tech Stack: Next.js, React.js, Node.js, PostgreSQL

- Developed an AI-powered call intelligence platform for auto repair shops to extract vehicle and symptom details from customer calls.
- Built clean intake summaries and operational workflows to help service teams review calls faster before the car arrives.
- Supported structured data capture and insight delivery to improve shop efficiency, customer communication, and intake accuracy.

Project URL: [ShopSignal](https://shopsignal.io)

Vertelier - Luxury Lab-Grown Diamond E-Commerce Platform

Tech Stack: NextJS, NodeJS, Tailwind CSS, PostgreSQL

- Developed a premium e-commerce platform for luxury lab-grown diamond jewelry focused on delivering elegant shopping experiences, product personalization, and sustainable luxury storytelling. Built high-performance React.js storefronts and scalable Node.js backend systems with secure APIs, catalog management, order workflows, and dynamic product configuration capabilities.
- Implemented intelligent search, personalized recommendation flows, analytics-driven customer engagement features, and optimized conversion funnels to enhance product discovery, customer retention, and seamless end-to-end purchasing experiences across web and mobile platforms.

Project URL: [Vertelier](https://vertelier.com)

MoneyAtlas - Personal Finance & Financial Insights Platform

Tech Stack: React.js, Node.js, MongoDB, AWS

- Developed a scalable financial insights platform focused on helping users make informed decisions through investment research, personal finance tools, market analysis, and educational content experiences. Built responsive React.js interfaces and high-performance Node.js backend systems with dynamic APIs, content management workflows, and data aggregation pipelines.
- Implemented intelligent recommendation systems, analytics dashboards, and automated reporting features to deliver personalized financial insights, trend tracking, comparison tools, and structured data visualization for enhanced user engagement and decision-making.

Project URL: [MoneyAtlas](#)

AI AUTOMATION & EXPERIMENTAL SYSTEMS

- Built AI-driven automation platforms focused on conversational AI, workflow orchestration, document intelligence, and productivity automation (AgentFlow AI, AI Business Analyst, AI Customer Support, AI Job Interview Agent).
- Delivered proof-of-concept systems including AI business analysts, customer support assistants, interview simulators, and voice/interaction tools, plus document-intelligence pipelines (AgentFlow AI, AI Business Analyst, AI Customer Support, AI Job Interview Agent).
- Experimented with LLM integrations, multi-step automation flows, tool-based interactions, and AI-assisted content generation; integrated Darlink.ai for multimodal knowledge linking, provenance-aware retrieval, and dynamic context stitching to enable citation-backed agent responses.

Selected AI Systems:

- AgentFlow AI
- AI Business Analyst
- AI Customer Support
- AI Job Interview Agent
- [Darlink.ai](#)

Architecture snapshots and workflow demos are available in the portfolio.

LEADERSHIP & COLLABORATION

- Conducted PR reviews, sprint planning, architecture discussions, and technical execution planning.
 - Collaborated directly with clients, founders, and stakeholders to define scalable product roadmaps.
 - Experienced in remote collaboration, Agile workflows, feature prioritization, and long-term product ownership.
-

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT)

P P Savani University

ADDITIONAL INFORMATION

- Open to Remote Opportunities and Long-Term Product-Focused Roles
- Available to Join Within 1 Week
- Experience collaborating with distributed teams, startups, and product-driven organizations
- Portfolio includes architecture snapshots, workflow demonstrations, and selected AI system implementations
